

## Belt conveyor covers

Global solutions for belt conveyor protection

**We are Pioneers & Specialists**

The first and only company specialized in covering belt conveyors all around the world

**We are Manufacturers**

Our products are designed and manufactured within our own factory

**We are Direct Sellers**

We offer our products directly  
Take full advantage of it in terms of cost, quality and efficiency

**We are Experts**

Over ten years designing and manufacturing belt conveyor covers

**We are Internationally Oriented & Dynamic**

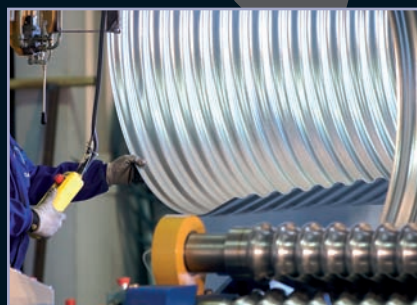

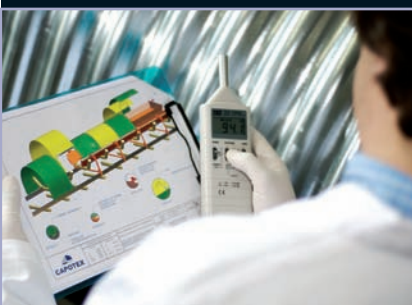

Traveling, delivering and covering no matter where you are

**We are Environmentally Committed**

Always concerned about our Planet Earth

**Engineering Partners**

For special projects we design our covers with your engineers

## What we do

Advanced solutions for belt conveyor protection

### Cover any conveyor

We offer both standard and custom covers for belt conveyors  
Consult our technical department

### Wide Range of Materials

Steel, fiber-glass, aluminium... It just depends on your application

### World-Wide Distribution

Efficient and low-cost delivery anywhere

### Long Overland Conveyors

We have covered some of the longest belt conveyors all around the world

### Research, Development & Innovation

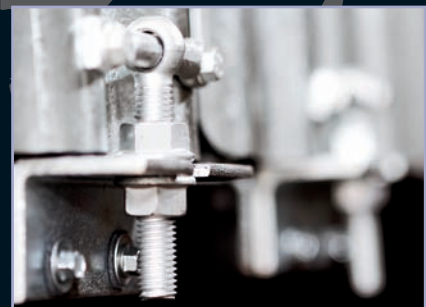

Ideas & engineering put together

### Environmental Protection

Not only our products but also our procedures are environmentally friendly

### Customer Service

Far beyond the selling itself

**capotexplus** ▶

The definitive cover

- Fully enclosed.
- Robust, aerodynamic and lightweight.
- Allows opening for easy conveyor maintenance.
- Very simple installation.
- Tailor-made for any belt conveyor model and size.
- All dangerous edges are eliminated.
- Resistant to extreme environmental conditions.
- Manufactured using top-class materials.

Models available:

**madrid**, hinged on both sides.

**paris**, hinged on one side.

**dakar**, unexpensive, wide range of fixings available.

**open models** ▶

Freely accessible covers

Options available:

**durban**, accessible from one side.

**berlin**, accessible from both sides.

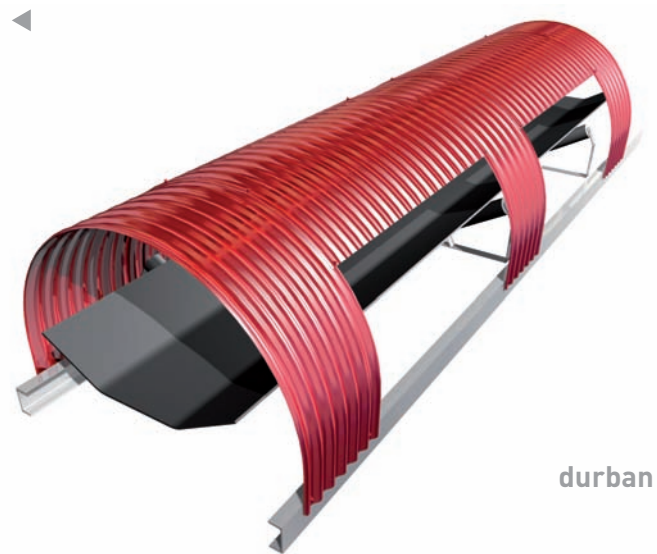

**caposide** ▶

Lateral wind-shields

- Tailor-made in both height and length.
- Wide range of fixings available.
- Adaptable to any belt conveyor.

durban

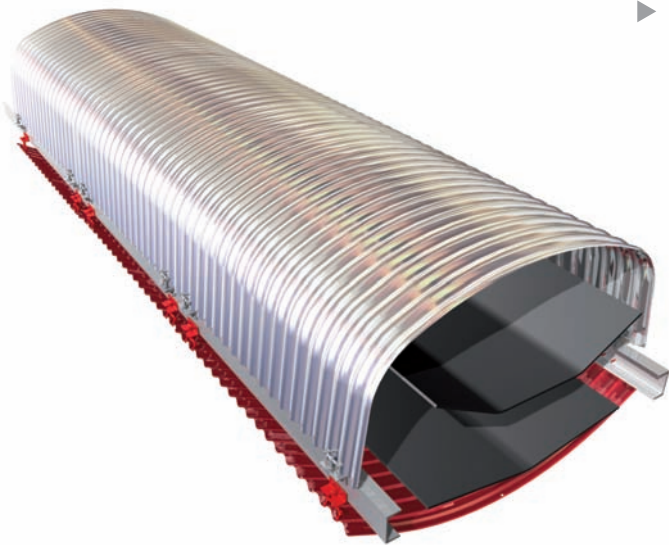

◀ **capoarc**

Simple arch-shaped cover

Easy to open for maintenance from both sides.

Lightweight and economic.

Specially designed for installation over channellers and loading chutes.

◀ **capotray**

Easy-to-clean lower cover

Prevents material from falling.

Easily opened for fast cleaning of fallen material.

Perforated to allow water to pass through.

◀ **capowindow**

Quick inspection window

Allows quick inspection of the belt conveyor.

Very lightweight and easy to open.

Ergonomically designed.

Adaptable to any covering model.

Other window designs available.

## ▽ Capotex product range examples

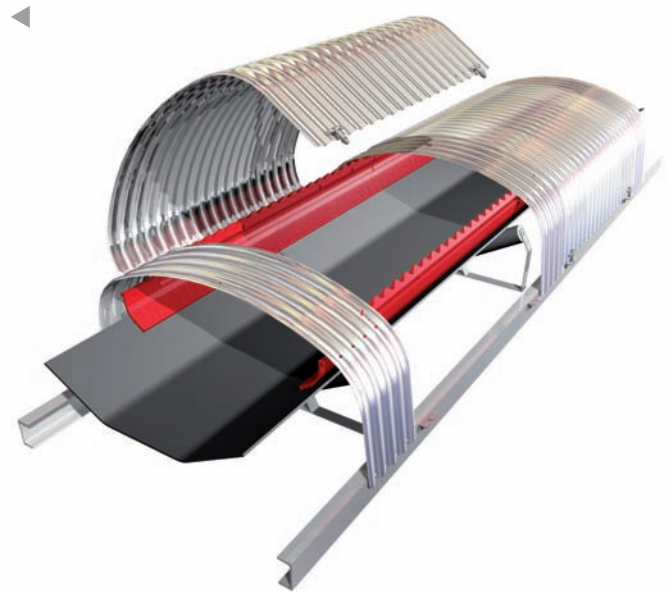

### caposkirt ▶

Cover with high-performance skirt

Turns any standard belt conveyor into a fully enclosed system, which prevents material from falling and dust emissions.

Our patented self-adapting articulation system achieves maximum leak-tightness with minimum friction.

It includes a simple replacement system.

### capodust ▶

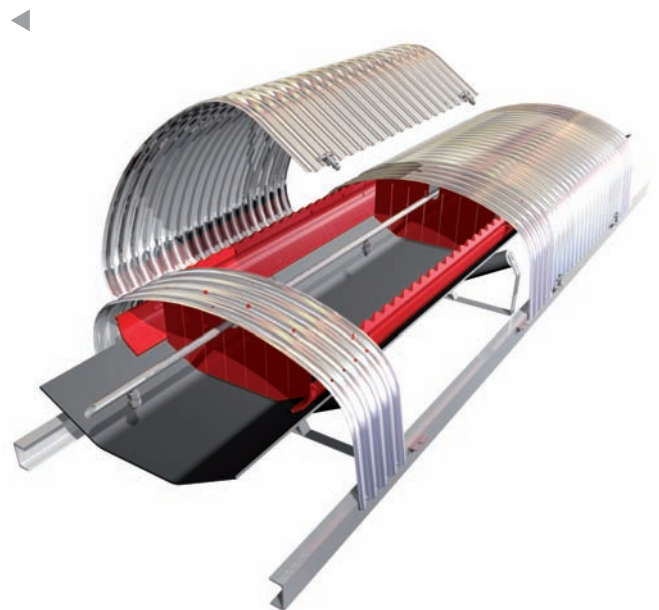

Universal cover for dust suppression systems

Cover adaptable to any dust suppression system on the market.

Reduces water consumption.

Allows easy access for maintenance.

Maximum performance if the **caposkirt** and **capocurtain** systems are added.

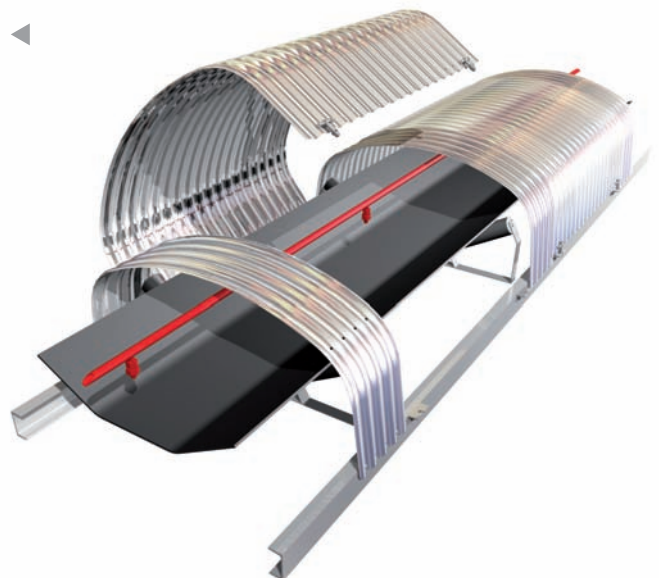

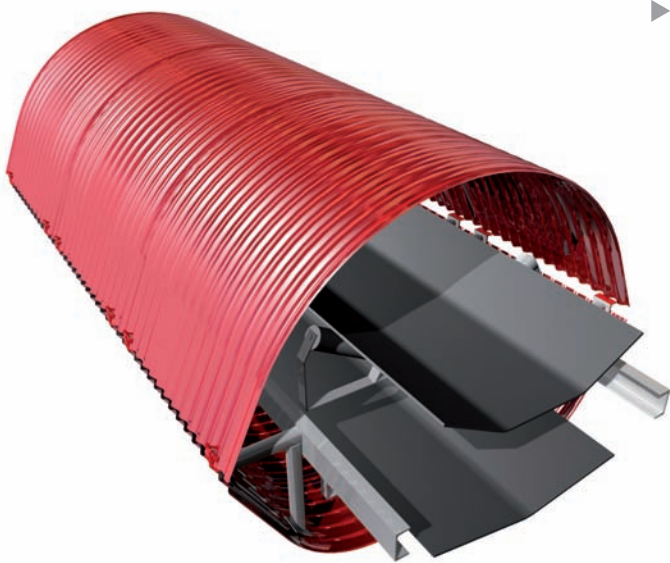

### capofire ▶

Fireproof system

Cover adapted to all fire-extinguishing systems.

Enables all covers to be opened for fast access.

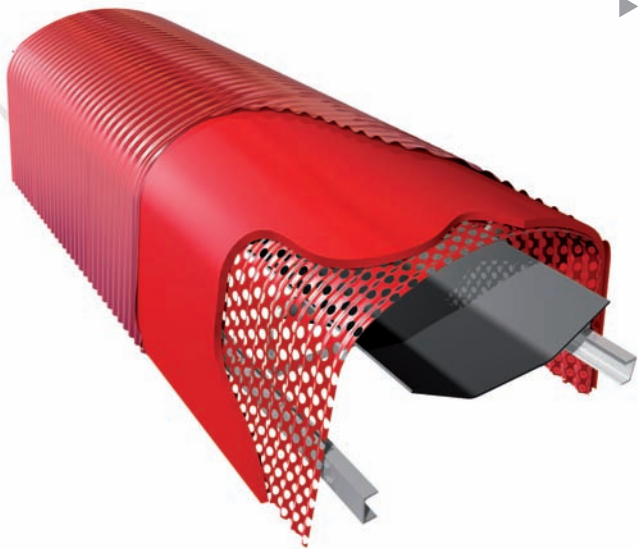

◀ **capowind**

Cover for extreme wind conditions

Aerodynamically optimized.

Withstands winds over 180 km/h (110mph).

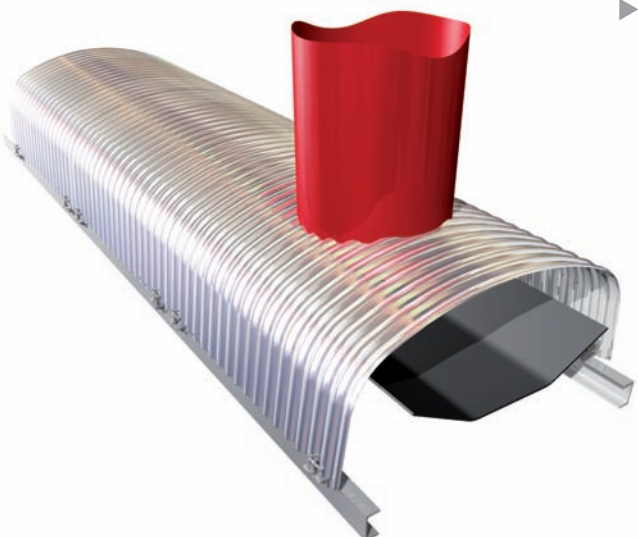

◀ **caponoise**

Noise reduction cover

Triple layered cover for maximum noise absorption.

Adaptable to any belt conveyor.

◀ **capovac**

Cover adapted to dust extraction systems

Cover with sleeve filter connection.

If the **caposkirt** and **capocurtain** accessories are added, maximum performance is achieved and power consumption is reduced.

Covering some of the longest belt conveyors all around the world.
